

PURSUIT 3480 CC

With the outstanding performance of Pursuit's new 3480 center console, it won't take you long to get out to where the fish are hiding. The 3480 is the latest addition to Pursuit's line; it features a notched transom combined with a 24.5° deadrise to deliver what Pursuit says are higher top-end speeds and improved performance in adverse conditions. The helm leaning post is equipped with a 55-gallon livewell and built-in tackle storage. An additional 35-gallon livewell is available in the transom. Four large, insulated fish boxes hold the day's catch and all your gear. The gunwales hold rods and gaffs conveniently out of the way and are fully padded from stem to stern for passenger and angler comfort.
